ACHIEVEMENTS

- Phi Theta Kappa, Honor Society
- 4.0 College GPA

EXPERIENCE

Accounting System Console Application

C# | .NET Core | SQL
Utilized object relational mapping to create an application in C# that reads, creates, updates, and deletes (CRUD) data from SQL database. Application allows users to login, enter invoices, print checks (clear open invoices), review account balances, and check net income/loss.
[See Project on GitHub](#)

Half Marathon Text Adventure Game

C# | .NET Core
Built a text game in C# using class constructors, properties, and methods to run, organize, and track the user's progress and score. User is encouraged to complete the race by carefully choosing from multiple options that influences their outcome.
[See Project on GitHub](#)

Weather Console Application

C# | .NET Core | JSON | API
Created a weather application in C# using an API from Open Weather Map. Embedded imperial measurements in URL to retrieve data in Fahrenheit. Parsed with JSON. Application allows user to get weather based on city entered.
